

Prepare:

a. For annotator 1:

batch1_sampled (for the purpose of original certainty annotate),

batch2_sampled (for the purpose of re-annotation),

batch3_sampled (for the purpose of re-annotation).

b. For annotator 2:

batch1_sampled ((for the purpose of re-annotation),

batch2_sampled (for the purpose of original certainty annotate),

batch3_sampled (for the purpose of re-annotation).

c. For annotator 3:

batch1_sampled (for the purpose of re-annotation),

batch2_sampled (for the purpose of re-annotation),

batch3_sampled (for the purpose of original certainty annotate).

Step 1. Revisit the definition of sarcasm (file: data_collection). (<5 m)**Step 2. Re-annotate batch1_sampled (66 utterances) (<15m):**

Annotators open “batch1_sampled_a*” in their folder. They are granted access to batch 1 videos.

Everyone goes through videos in “batch1 videos” according to the id number listed on the annotation sheet. After watching each video, you give a label (“s” or “ns”) on the “label” column, and give a certainty score to the utterances labeled as “s”. **Label the unclear ones as “a” (for ambiguous). After annotation, resolve the “a” label by discussion session. (either agree on a majority vote or dispose of it).**

Step 3. Re-annotate batch2_sampled (116 utterances) (<20m):

Annotators open “batch2_sampled_a*” in their folder. They are granted access to batch 2 videos.

Everyone goes through videos in “batch 2 videos” according to the id number listed on the assigned annotation sheet. After watching each video, you give a label (“s” or “ns”) on the “label” column, and give a certainty score to the utterances labeled as “s”. Label the unclear ones as “a” (for ambiguous). After annotation, resolve the “a” label by discussion session. (either agree on a majority vote or dispose of it).

Step 4. Re-annotate batch3_sampled (130 utterances) (<30m):

Annotators open “batch3_sampled_a*” in their folder. They are granted access to batch 3 videos.

Everyone goes through videos in “batch 3 videos” according to the id number listed on the assigned annotation sheet. After watching each video, you give a label (“s” or “ns”) on the “label” column, and give a certainty score to the utterances labeled as “s”. Label the unclear ones as “a” (for ambiguous). After annotation, resolve the “a” label by discussion session. (either agree on a majority vote or dispose of it).
